

## Hospital-Grade Surface Sanitiser

500 mL

---

### DESCRIPTION:

GermShield is a hospital-grade surface sanitiser. It works against a wide array of bacteria, viruses and other common disease-causing bacteria such as MRSA, Norovirus and H1N1 Type Viruses.

It also provides long-term protection against mould, mildew, algae and yeast.

GermShield technology bonds to the surface by creating a protective bio shield. The antibacterial coating destroys most germs that come into contact with the surface. This coating is effective up to 90 days.

---

### DIRECTIONS:

GermShield is a ready-to-use surface protectant.

Spray directly onto an applicator such as a cloth and wipe on to the surface to be cleaned and protected. It can also be applied directly on to the surface to be cleaned and protected.

GermShield can also be used as a fogger via a fogging applicator to get into hard-to-reach and all touch point surfaces.

---

### PHYSICAL AND CHEMICAL PROPERTIES:

<b>Appearance:</b>	Clear Colourless
<b>Odour:</b>	Odourless
<b>Specific Gravity:</b>	0.98 – 1.02
<b>pH:</b>	4.5 – 5.5

---

### FIRST AID MEASURES:

#### Ingestion:

Immediately rinse mouth with water. If swallowed do not induce vomiting. Give water to drink. Never give anything by mouth to an unconscious person. Seek immediate medical aid immediately.

#### Eye Contact:

Immediately flush eyes with large amounts of water for at least 15 minutes while holding eyelids open. Transport to the nearest medical facility for additional treatment. Do not rub eyes or keep eyes closed.

#### Skin Contact:

Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available.

#### Inhalation:

Remove the affected person out to a ventilated area. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention.
