

# Oxivance Express 1% RTU

## Hospital Grade Disinfectant & Virucide

1 Litre - P920  
5 Litres - P925

---

### DESCRIPTION:

*Oxivance Express 1% RTU* is a single application broad-spectrum surface sanitiser, cleaner, and disinfectant. This fast-acting formula contains stabilised hydrogen peroxide which is highly effective in killing viruses, bacteria, fungi, mold, and mildew. The active ingredient degrades to water and oxygen after use which makes it safe to use around children, pets, and people with allergies.

It is non-toxic to the environment and gentle on surfaces. Kills SARS-CoV-2 (COVID-19 virus). Test data available on request.

Designed for multiple surfaces in childcare centers, schools, universities, public buildings, public restrooms, commercial facilities, retail businesses, recreational facilities, hotels (motels), and more.

---

### DIRECTIONS:

1. Apply *Oxivance Express 1%* undiluted to surfaces by spray applicator, cloth, or disposable wipe.
2. Surfaces must remain visibly wet for a short period of time to effectively destroy common bacteria (up to 60 seconds) and viruses (up to 10 minutes).
3. No rinse formula for non-food contact surfaces. If disinfecting food contact surfaces, rinse with water.

Note: Do not use warm water. Do not mix with other products. Do not use on surfaces sensitive to water or acid. Ensure surface stays wet for duration of contact time.

---

### PHYSICAL AND CHEMICAL PROPERTIES:

**Appearance:** Clear  
**Odour:** Odourless  
**Specific Gravity:** 1.010  
**pH:** Approx. 2.0

\*The above data is typical of normal production and should not be taken as a specification.

\*Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet. Store in original container. Avoid extremes of temperature. Reacts with oxidisable substances.

---

### FIRST AID MEASURES:

#### Ingestion:

Immediately rinse mouth with water. If swallowed do not induce vomiting. Give water to drink. Never give anything by mouth to an unconscious person. Seek medical aid immediately.

#### Eye Contact:

Immediately flush eyes with large amounts of water for at least 15 minutes while holding eyelids open. Transport to the nearest medical facility for additional treatment. Do not rub eyes or keep eyes closed.

#### Skin Contact:

Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available.

#### Inhalation:

Remove the effected person out to a ventilated area. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention.
