

SpotOut Protein

Protein & Food Stain Spotter

500mL - P2601

5L - P2605

DESCRIPTION:

SpotOut Protein is an effective formulation developed for the removal of food and protein based spots and spills. Its higher pH formulation will remove a range of stains such as butter, milk and cooking fats, general soft drink spills and most household protein-type of stains.

DIRECTIONS:

Spotting: Do not dilute. May be applied neat using a trigger sprayer during the extraction process or in the treatment of stains that have not been removed by extraction cleaning.

Note: Always ensure the spot is rinsed, neutralised or extracted after using ProSpotter.

PreSpray: SpotOut Protein can be used as a pre-spray for emergency use. Dilute SpotOut Protein with eight parts water and very evenly pre-spray traffic areas allowing two or three minutes dwell time to emulsify soil. Rinse with suitable extraction machine using clean hot water.

PHYSICAL AND CHEMICAL PROPERTIES:

Appearance:	Clear Green
Odour:	Fresh Lavender
Specific Gravity:	1.00
pH:	9.5 +/- 0.5

FIRST AID MEASURES:

Ingestion:

Immediately rinse mouth with water. If swallowed do not induce vomiting. Give water to drink. Never give anything by mouth to an unconscious person. Seek immediate medical attention.

Eye Contact:

Immediately flush eyes with large amounts of water for at least 15 minutes while holding eyelids open. Transport to the nearest medical facility for additional treatment. Do not rub eyes or keep eyes closed.

Skin Contact:

Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available.

Inhalation:

Remove the affected person out to a ventilated area. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Seek medical attention.
